Dear Hiring Manager,

I am writing to express my interest in the **Frontend Developer** position at your organization. I have over **3+ years of experience in front-end development**, specializing in building scalable and user-friendly web applications using **React.js and modern JavaScript technologies**.

In my recent role at **Avya Inventrax Pvt Ltd**, I developed responsive and high-performance web applications using **React.js, Redux, JavaScript (ES6+), HTML5, CSS3, and REST APIs**. I focused on building reusable UI components, improving application performance, and delivering seamless user experiences. I also collaborated closely with backend teams to integrate APIs and implement secure authentication workflows.

Previously, I worked at **ITPrior Innovation Pvt Ltd**, where I contributed to multiple projects including **Vizag Updates**. During this time, I built dynamic UI components, improved application performance, and ensured responsive designs across multiple devices. These experiences helped me develop strong expertise in **state management, component architecture, API integration, and responsive UI development**.

I am passionate about writing clean, maintainable code and continuously improving my skills in modern front-end technologies. I believe my experience in **frontend development, UI optimization, and teamwork** would make me a valuable addition to your development team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and experience align with your team's needs.

Sincerely,
Prasanth Kumar
