Dear Hiring Manager,

I am writing to express my interest in the React Developer position at your organization. I have over **3+ years of experience in front-end development**, specializing in building scalable and user-friendly web applications using **React.js and modern JavaScript technologies**.

In my recent role at **Avya Inventrax Pvt Ltd**, I worked on developing responsive and high-performance web applications using **React.js, Redux, JavaScript (ES6+), HTML5, CSS3, and REST APIs**. My responsibilities included creating reusable UI components, improving application performance, and delivering seamless user experiences. I also collaborated closely with backend teams to integrate APIs and implement secure authentication workflows.

Prior to that, I worked with **ITPrior Innovation Pvt Ltd**, where I contributed to multiple projects including **Vizag Updates**. During this time, I developed dynamic UI components, optimized application performance, and ensured responsive designs across devices. These experiences helped me build strong expertise in **state management, API integration, component architecture, and scalable front-end development**.

I am passionate about writing clean, maintainable code and continuously improving my skills in modern front-end technologies. I believe my experience in **React.js development, problem-solving, and teamwork** would make me a valuable addition to your development team.

I would welcome the opportunity to discuss how my skills and experience align with your team's needs. Thank you for your time and consideration.

Sincerely,
Prasanth Kumar
